

# DECLARATION OF MATERIALS

## DECLARATION OF MATERIALS

All materials present in/on deliverable space qualified hardware are available for each customer. Where possible, materials can be added, subtracted, or modified to satisfy specific contract requirements per customer request.

All space projects shall include full declaration of all constituent materials used, including supplier and trace information, work operations, environmental test profiles, and work flow details. The only exceptions to DiTom's declaration policy are proprietary design details, trade secrets, or any otherwise controlled information whether by customer NDA or at the request of other regulatory and government bodies. We take pride in our effort to communicate all pertinent information to our customers at all milestones of the manufacturing process for space qualified hardware.

For additional information regarding our Declaration of Materials please contact us at 559.255.7042 or [sales@ditom.com](mailto:sales@ditom.com)
