QUALITY

QUALITY

The following DiTom Quality Operating Procedure (QOP) documents, at a minimum, shall apply to the construction of space flight and space qualification hardware:

- QOP-424-001 Control of Records
- QOP-730-001 Design Control
- QOP-752-001 Identification and Traceability
- QOP-755-001 Preservation of Product
- QOP-755-002 Work Area Controls
- QOP-753-003 Environmental Testing
- QOP-760-001 Monitoring and Measurement Equipment

DiTom currently maintains an AS9100C qualified Quality Management System (QMS). Through both periodic internal audits and 3rd party registrar audits, we constantly monitor the performance of all processes carried out at our facility. Encouraging personnel at all levels of the company to provide feedback allows us to take multiple perspectives into account for everything we do in order to improve upon the job we perform every day. All of DiTom's internal quality documents are made available to our customers for review at any time, and customer visits to our facility are always welcome and encouraged.

Please feel free to contact us at 559.255.7042 or sales@ditom.com for additional information.
